### **Comparison of the TS2 Testbox to the TS2 Virtual Cabinet**

The following is a comparison of the obsolete TS2 Testbox Conflict Monitor Tester to the current production TS2 Virtual Cabinet model. ATSI or your local distributor will take the older TS2 Testbox in trade towards the purchase of the current TS2 Virtual Cabinet Model. Contact ATSI or your local distributor for details and a quote.

The following is a comparison of the TS2 Virtual Cabinet (Model TVC 3500) to the TS2 Testbox (Model 920).

- ✓ The TVC 3500 can save MMU Program Card setups as predefined configurations.
- ✓ The TVC 3500 connects to the computer with a USB cable as opposed to a serial Cable.
- ✓ The TVC 3500 does not require a power supply. Power is supplied through the USB cable.
- ✓ ATSI offers customer service that is second to none.

ATSI has no reseller affiliation with any controller manufacturer. We do not sell controllers to keep us in the position of not having a bias towards any particular brand or model. The TVC 3500 is designed to conform to the current published standards.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ben Hartley', written in a cursive style.
